SUMMARY

ML/AI Engineer with experience building machine learning and AI projects from problem definition and data preparation to model development, application integration, and deployment. Skilled in Python, machine learning, APIs, Streamlit applications, Cloud, Docker, and generative AI workflows. Interested in creating practical, maintainable applications that make AI and machine learning models easier to use.

PROFESSIONAL EXPERIENCE

Machine Learning Engineer

06/2025 – 12/2025

Independent Client Project Medicare Part D Drug Spending Forecasting Tool

Remote

- Collaborated with the client to define forecasting objectives, requirements, and project scope.
- Prepared Medicare Part D data and developed a forecasting pipeline using LightGBM and Optuna.
- Performed feature engineering, model training, time-based evaluation, and forecast generation.
- Built and deployed a Streamlit dashboard for exploring forecasts, cost drivers, and model explanations.

DevOps and Cloud Intern

10/2024 – 12/2024

AlNafi Global Internship Program

Remote

- Completed practical training in Linux, Docker, Kubernetes, cloud computing, and DevOps fundamentals.
- Worked with Linux commands, file systems, permissions, containers, and technical documentation.
- Gained introductory knowledge of cloud operations, system administration, GRC, and blockchain concepts.

PHARMACY EXPERIENCE

07/2026 – 08/2026

Pharmacy Intern | Rasheed Pharmacy

Vehari

- Assisted with reading prescriptions and understanding dispensing procedures under professional supervision.
- Developed familiarity with common medicines, brand names, dosage forms, and pharmacy operations.
- Supported stock organization and observed patient interaction in a community pharmacy setting.

Business Data Analyst Intern

02/2023 – 08/2023

Forage Virtual Internship

Remote

- Prepared and analyzed business datasets through practical case-study tasks.
- Created visualizations and reports to communicate findings clearly.

PROJECTS

StudyMind AI (RAG Study Assistant)

Python | LangChain | FAISS | Ollama | Streamlit

- Developed a Retrieval-Augmented Generation (RAG) study assistant supporting both local and cloud inference.
- Implemented document ingestion, vector search, embeddings, question answering, and quiz generation.
- Built an interactive Streamlit interface for document upload and AI-powered learning.

Nexus IT Assistant

Python | LangGraph | LangChain | GPT

- Built an AI-powered IT support assistant using LangGraph's ReAct architecture with tool calling and conversation memory.
- Implemented automatic switching between local Ollama models and cloud-based GPT models.
- Developed a Streamlit interface for interactive troubleshooting and AI-assisted support workflows.

QSAR Prediction Using Machine Learning

Computational Drug Discovery | Python | Machine Learning

- Developed a QSAR application to predict molecular bioactivity from chemical structures and molecular descriptors.
- Applied machine learning to a computational drug-discovery problem.
- Built data preparation, feature engineering, modelling, evaluation, and prediction workflows.
- Developed a FastAPI backend and Streamlit interface for the application.
- Implemented SHAP-based explanations for model interpretability.

DocScan OCR Pipeline

Python | MLOps | Docker

- Engineered an OCR pipeline using EasyOCR with FastAPI and Streamlit.
- Integrated MLflow for experiment tracking, Docker for deployment, and monitoring for model reliability.
- Designed a modular architecture to support OCR workflows.

EDUCATION

Doctor of Pharmacy (Pharm.D)

Islamia University of Bahawalpur (IUB)

09/2020 – 04/2026
Bahawalpur, Pakistan

- Studied pharmacology, medicinal chemistry, pharmaceuticals, pharmacotherapy, clinical pharmacy, pharmaceutical analysis, microbiology, pathology, and patient care.
- Developed an understanding of drug mechanisms, dosage, safety, interactions, and evidence-based medication use.
- Independently learned data science, machine learning, AI, application development, and deployment alongside the Pharm.D degree.

SKILLS

Programming and Data: Python, SQL, Pandas, NumPy, SQLite, Excel

Machine Learning: Scikit-learn, XGBoost, LightGBM, TensorFlow, PyTorch, Optuna, Feature Engineering, Model Evaluation

Generative AI: LangChain, LangGraph, Retrieval-Augmented Generation (RAG), FAISS, Ollama, Gemini, Prompt Engineering

Backend Development: FastAPI, Flask, REST APIs

Frontend Development: Streamlit, React, HTML, CSS

MLOps and Deployment: Docker, Git, GitHub, MLflow, AWS, Render, Streamlit

Data Visualization: Plotly, Matplotlib, Excel

CONTENT AND PUBLICATIONS

AI Insights & Innovations Newsletter

01/01/2025

LinkedIn

- Publish practical articles on machine learning, generative AI, deployment, and software engineering.
- Share lessons from building end-to-end AI/ML projects and production-oriented workflows.
- Built a community of 1,000+ LinkedIn newsletter subscribers.

BuildWithUzair

27/08/2026

YouTube Channel

- Create tutorials and short educational videos about AI, machine learning, and application development.
- Share practical steps for moving AI/ML projects from initial ideas to deployment.
